thickness

PROFILE

High quality skim finish

A high quality fine finishing plaster for internal use to achieve an attractive smooth or fine polished finish.

Fast, easy application

Quick and easy to use. A fast setting time allows for fast and efficient completions in as little as 3 hrs start to finish.

Apply to most surfaces

Well suited as the top coat finishing plaster for most internal walls and ceilings. Typically applied as the skim finish to a lime plaster system. Can be used to skim over old lime plaster walls and ceilings.

Alternative to gypsum

Easy two-coat skim finish for plasterboard. Apply base coat at 2mm, top coat at 1-2mm and trowel to a smooth finish.
